29 March 2022

**Stockpile Remediation - UPDATE**  
**167-169 William Street, Beverley SA 5009**

Dear Sir / Madam

We write to update the community in relation to the stockpile remediation at 167-169 & Lot 2021 McLean Street, Beverley.

We are pleased to advise the Old Red Brick Company commenced loading out stockpiled materials on site on Monday, 28 March 2022 as per the Stockpile Remediation Plan.

These on-site works have commenced under the supervision of both the South Australian Environment Protection Authority (SA EPA) and our environmental consultant, LBWCo.

Air Monitoring results for works conducted on site will be uploaded to the Old Red Brick Company website and provided to the EPA on a weekly basis.

We remain vigilant with respect to the potential for the works to generate dust.

- A dust barrier has been erected along the northern corner of the site
- A water truck is being utilised on site, at all times during loadout works
- An onsite weather station is continuously monitoring weather conditions to ensure the suitability for the works taking place on site

We will continue to provide regular updates to the community on the progression of works on site. These updates will also be uploaded to the dedicated page on our website.

**We welcome your feedback**

If you have any feedback or would like to ask a question, please do not hesitate to contact us. Should you wish to meet with, or speak to the team, please contact: Courtney at TSA: 0459 528 057.

The Old Red Brick Co has a dedicated page on its website pertaining to site remediation which can be found at the following link:
