Stockpile Remediation - UPDATE
167-169 William Street, Beverley SA 5009

Dear Sir / Madam

We write to update the community in relation to the stockpile remediation at 167-169 William Street & Lot 2021 McLean Street, Beverley.

We are pleased to advise the Old Red Brick Company completed Stages 4 & 5 of the Site Remediation Plan (SRP). This milestone involves the complete removal of all waste material from Lot 2021 McLean Street, Beverley.

Works will continue in the coming fortnight with works on Stage 5 and Stage 6 of the SRP. This phase of works involves the ongoing removal of stockpiles from 167-169 William Street, Beverley. These works will continue under the supervision of our environmental consultant, LBWCo, with monitoring from South Australian EPA.

Air Monitoring results for works conducted on site will continue to be uploaded to the Old Red Brick Company website and provided to the EPA. Air-monitoring results to date have found there are no detectable traces of hazardous airborne materials being released. The frequency of air-monitoring has been reduced given that the last 8 weeks monitoring has not yielded a single positive result.

We will continue to provide regular updates to the community on the progression of works on site.

The Old Red Brick Co has a dedicated page on its website pertaining to site remediation which can be found at the following link:
